SUNDAY PEATURES.

Scarcely anything can be more interesting to the citizens of New York than to know who will succeed Richard Croker as Boss of Tammany Hall. For in the hands of this new king rests the ment of this big town for the few years at least. Will this new this new "Central Power." continue the theory of municipal governent as pursued by Mr. Croker? Has Mr. Croker sufficient influence in Tammany to name his successor? If so, the man Mr. Croker will name will undoubtly be John J. Scannell, the President of

the Board of Fire Commissioners.

As the possible successor of Mr.

Croker, as the great chief of Tammany. it in interesting to know something about Mr. Scannell. The "Sunday World" to-morrow will publish a carefully prepared biography of this gentleman, giving his early history as a practical poli-tician, and telling the details of his aurder of Thomas Donohue, whom Mr. Scannell shot and killed in a reol-room some years ago, and the close friendship which has existed between se acquainted in Murderers' Row

Miss Meg Merrilles has discovered a physician uptown whose theory of pracce necessitates the starving of his patients on a hot-water diet until they behollow-eyed, walking skeletons. BURY PROUE INVESTIGATORS.

The Senate bribery investigation is ing farce of a thoroughly diseful session. The investigators overed what they knew before at Charles W. The appointment of the Committee was a blind. The best proof is the fact that it has done nothing but apply a daub of whitewash to Senators Hunton and Kyle, who were honest enough to promptly expose the attempts to bribe them, and needed no committee kalsomining. The Committee was raised to divert the attention of the public from the fact that the Senate's own acts during the session had invited the bribery Who would have approached Rosco Conkling, or Charles Sumner, or John C Calhoun, or William L. MORE FISHING.

President Cleveland has not left off fishing. As soon as he returned to the Little Sliver Workers, Strooklyn. House he got out his rod and line, baited his book with the tempting Lain and Lazze Howard, Brooklyn morsel of the Naval Office, dropped it into the waters of Anti-Snapperism and ville at the Central Opera-House this will be such that he will never think of order-'landed" C. C. Baldwin.

Then, with the position of Internal Revenue Collector for the Second District of New York substituted for the Aistom-House sinecure, our National fisherman made another cast and drew in out of the old County Democracy stream, at present running pretty low that faithful follower of ex-Boss Maurice J. Power, John A. Sullivan.

Mr. Baldwin's appointment is regarded as precluding the appointment of another Anti-Snapper settler in this city of the Southern brigadier class, who has been eagerly expectant of the Custom House Surveyorship. Now that Mr. Cleveland has started his patronage fishing it is thought probable that he will fill his bag.

EAMPSON'S STORY

A singular story was told yesterday by Capt. Sampson before the Congressional Investigating Committee raised to inquire into the Carnegie frauds. It shows very clearly how necessary was the investigation.

The frauds are admitted, if they are not regarded by Capt. Sampson as serious. But the singular part of the business is the conclusions the Captain has reached after his very slight in vestigation while sojourning at the Carnegie Club. To the Editor: When a man is single life's a pleasure His good times he can number by the score; He does just what he pleases with his leisure; Makes love to half a dozen girls or more. His days and nights are free from melancholy; His blisses many and his sorrows few; There's no one to upbraid him for his folly, Or tell him what he should or shouldn't do

Then life is very aweet; Existence seems complete: With happiness his heart and pulses tingle; The world looks bright and fair; For its strife he doesn't care; He knows his days of happiness are o'er;

He's nearly always in a dreadful hurry; It's hard to keep the grim wolf from He passes many bours in regretting The fatal day he book to him a wife; His face grows old and wrinkled up with fretting For him there's naught but drudgery in life.

Strawberries in Jelly.

Strawberries in jelly make a good

dessert. A little gelatine is melted in

cold water, and to it is added the juice

of a pint of red currants. This is sweet-

ened. About a pint of hulled strawber-

ries are added, and the whole poured

into moulds and set on the ice to harden.

As soon as the Summer girl appears the sailor hat is sure to follow. Last year's sailor, with its simplicity of trimming to outrivalled this season by a smaller hat which does not scorn a goodly proportion of u to-date trimming. Among the new sailors there is an odd little hat made of white leather. A band of pale green moire ribbon encircles the rather flat crown, while at either side bunches of nignonette, lavishly sprayed with jet, are arranged. An extremely chic sailor hat is of sunburnt straw, studded with gilt. Loops of pale magenta velvet and clusters of black violets are caught, their long stems hanging over the hair.

Some Graceful Ten Gowns.

A charming tea gown is made of pale green Tabdar satin, opening in front over draperies of soft Sirang silk in a Paisley design, carried out in artistic colorings. These Sirang draperies are gathered up in front under a small rosette of the same silk. The upper sleeves are of pale green Tabdar satin, the undersleeves being of Sirang silk. Another exquisite tea gown is of delicate pink satin, patterned with white and embroidered in silk with tiny bunches of pink flowers. The draped bodice is cut slightly low in front and bordered with black goods, if of a good quality, well a band of cream guipure, while round the waist is a jewelled girdle with them.
